Summary of Legislation: This bill provides a property tax deduction for an owner of a commercial golf course who allows elementary or secondary school students to use the golf course without charge.

Explanation of Local Expenditures:

Explanation of Local Revenues: The property tax deduction for the owner of a golf course would have no fiscal impact on the revenue of local governments.

The deduction would cause a shift from the property taxes paid by the golf course owner to other taxpayers. The amount of the shift is unknown but would depend on the amount of free golf provided by the course to students and the percentage that the course's assessed valuation is of the total assessed valuation of the taxing district. The amount of the assessed valuation deduction equals the fair market value of golf the course provides to students for free. The golf course would be required to provide the county auditor an accurate statement of the golf course usages that entitles the owner to a deduction.

Background Information: Green fees range from \$10 to \$50 for 18 holes of golf. The average green fees are
